KEY SKILLS

AWS: EKS, ECS, EC2, RDS, S3, VPC, IAM, CloudWatch; also Azure (AKS, Key Vault, Entra ID)

Kubernetes & IaC: Kubernetes, Docker, Helm, Argo CD, Cilium, Velero, NGINX Ingress, Terraform, Ansible, GitOps

CI/CD & Observability: GitHub Actions, Azure DevOps, Jenkins, GitLab CI, Git, Prometheus, Grafana, Loki, OpenTelemetry

Linux & Networking: Linux (RHEL, Ubuntu) and Windows Server administration, DNS, TLS, VPC/VNet, load balancing

Scripting & Ops: Python, Bash/Shell, PowerShell, SLIs/SLOs, incident management, root-cause analysis, runbooks

PROFESSIONAL EXPERIENCE

DevOps & Platform Engineer | Independent Consulting Practice

Apr 2026 - Present

Current client: iHeal Information Technology LLC, Dubai. Regulated UAE healthcare platform on Azure and AKS.

- Moved 10+ services from AWS to Azure to keep patient data in the UAE, in one planned window with a DNS-level fallback.
- Built the Azure landing zone in Terraform across dev, staging and production: 50+ resources, all under Azure Policy.
- Got rid of static credentials: secrets in Key Vault behind private endpoints, workload identity federation, Entra ID RBAC.
- Run 5-node AKS with Cilium default-deny, NGINX Ingress, auto TLS, restore-tested Velero and 13 self-service pipelines.

Analyst - Infrastructure, Identity & Automation | HCLTech, Lucknow, India

Dec 2022 - Mar 2026

Client: Tenet Healthcare, Dallas (US). HIPAA-regulated hybrid Windows and Linux estate on AWS and on-premises.

- Automated routine operations across 300+ servers with Jenkins, PowerShell and Bash, saving about 40% of manual effort.
- Ran the AWS EC2, ECS and VPC infrastructure behind 80+ production workloads.
- Wired Moogsoft, Splunk and Grafana alerts straight into ServiceNow, which cut incident response time by 30%.
- Handled identity and access for 1M+ users across Active Directory and Entra ID, including RBAC and Conditional Access.

TechBee Scholar & Intern | HCLTech, India

Dec 2021 - Dec 2022

Independent Consulting Practice (remote, project-based; part-time until Mar 2026)

Platform Engineer (Contract) | Howie FlexCo, Vienna, Austria (Remote)

Sep 2025 - Aug 2026

GenAI startup. Multi-tenant SaaS platform on Azure and AKS. Part-time until Mar 2026, then a full-time retainer.

- Built observability on Prometheus, Grafana, Loki and Jaeger with 80 alert rules, and cut log ingestion by 360 GB a month.
- Defined SLIs and SLO targets for platform services, backed by error-budget burn-rate alerts.
- Ran multi-tenant AKS (3 node pools, 7 Helm services) in Terraform and shipped 49 releases in 90 days over 20 pipelines.

DevOps Engineer (Contract) | eigenKOR, Houston, USA (Remote)

Apr 2025 - Apr 2026

Fintech startup. AWS platform for 15+ microservices across two trading products.

- Built the whole AWS setup from scratch in Terraform as the only DevOps engineer on the team.
- Cut the monthly AWS bill by 40% through right-sizing, and order-execution latency by 73% with Redis caching and queues.

PROJECTS

Smriti | Build and release engineering for a desktop app

smriti.jadonharsh.in

macOS and Windows. Tauri, embedded CPython, FastAPI, uv, GitHub Actions. github.com/jadonharsh109/smriti-releases

- GitHub Actions release pipeline: one tag builds macOS and Windows installers, a Homebrew build and a Python wheel.
- Signed auto-updates checked against a built-in public key; every build input pinned by SHA256 for reproducible builds.
