PROFESSIONAL SUMMARY

DevOps and Platform Engineer with 4+ years in production infrastructure on AWS and Azure, the last three years focused on Kubernetes (AKS/EKS), Terraform, CI/CD, GitOps and observability. Currently the sole infrastructure engineer for a regulated UAE healthcare platform, including its move from AWS to Azure. Before that, ran multi-tenant AKS for a GenAI startup and built a fintech's AWS platform from scratch for 15+ microservices. HashiCorp Terraform Associate certified.

KEY SKILLS

AWS: EKS, ECS, EC2, RDS, S3, VPC, IAM, CloudWatch

Azure: AKS, ACR, VNet, Key Vault, Entra ID, Azure Policy, Azure Monitor, private endpoints

Kubernetes: Docker, Helm, Argo CD, Cilium, Calico, Kyverno, Velero, HPA, NGINX Ingress, AKS, EKS

Infrastructure as Code: Terraform, Ansible, GitOps

CI/CD: GitHub Actions, Azure DevOps, Jenkins, GitLab CI, Git, Trivy image scanning, release automation

Observability & SRE: Prometheus, Grafana, Loki, VictoriaMetrics, Jaeger, OpenTelemetry, Splunk, SLIs, SLOs, error budgets

Linux & Networking: Linux (RHEL, Ubuntu) and Windows Server administration, DNS, TLS, VPC, VNet, private endpoints, load balancing (NGINX Ingress, Application Gateway)

Security: RBAC, IAM, workload identity, secrets management (Key Vault), Trivy, Azure Policy, Kyverno

Scripting: Python, Bash/Shell scripting, PowerShell, YAML

Operations: Incident management, root-cause analysis, ITIL change management, ServiceNow, Jira, runbooks

PROFESSIONAL EXPERIENCE

DevOps & Platform Engineer

Apr 2026 - Present

Independent Consulting Practice

Remote

Current client: iHeal Information Technology LLC, Dubai. Regulated UAE healthcare platform on Azure and AKS.

- Moved 10+ services from AWS to Azure to keep patient data in the UAE, in one planned window with a DNS-level fallback.
- Built the Azure landing zone in Terraform for dev, staging and production: 50+ resources, all governed by Azure Policy.
- Removed static credentials: secrets management moved to Key Vault behind private endpoints, with workload identity federation and Entra ID RBAC.
- Run a 5-node AKS cluster serving 10+ services per environment, with Cilium default-deny network policy, NGINX Ingress and automatic TLS.
- Set up Velero backups and restore-tested them, so disaster recovery is proven rather than assumed.
- Built 13 self-service CI/CD pipelines in GitHub Actions and Azure DevOps; monitoring runs on Grafana, Loki and VictoriaMetrics.

Analyst - Infrastructure, Identity & Automation

Dec 2022 - Mar 2026

HCLTech

Lucknow, India

Client: Tenet Healthcare, Dallas (US). HIPAA-regulated hybrid Windows and Linux estate on AWS and on-premises.

- Automated routine operations across 300+ Linux and Windows servers with Jenkins pipelines, PowerShell and Bash, cutting manual effort by about 40%.
- Ran the AWS EC2, ECS and VPC infrastructure behind 80+ production workloads.
- Built monitoring and alerting in Moogsoft, Splunk and Grafana that escalated straight into ServiceNow, cutting incident response time by 30%.
- Rolled out patches and releases under ITIL change management with CAB approval.
- Handled identity and access for 1M+ users across hybrid Active Directory and Entra ID, including RBAC, Group Policy and Conditional Access.

TechBee Scholar & Intern

Dec 2021 - Dec 2022

HCLTech

India

- Employer-sponsored early-career programme: Linux and Windows server administration, shell scripting, virtualization, Git and LAN/WAN/VPN networking.

Independent Consulting Practice (remote, project-based; part-time until Mar 2026)

Platform Engineer (Contract)

Howie FlexCo

Sep 2025 - Aug 2026

Vienna, Austria (Remote)

GenAI startup. Multi-tenant SaaS platform on Azure and AKS. Part-time until Mar 2026, then a full-time retainer.

- Built observability on Prometheus, Grafana, Loki and Jaeger with 80 alert rules, and cut log ingestion by 360 GB a month.
- Defined SLIs and numeric SLO targets for platform services, with error-budget burn-rate alerting.
- Ran multi-tenant AKS across 3 autoscaling node pools and 7 Helm-based microservices, all managed in Terraform.
- Owned 20 GitHub Actions pipelines with Trivy image scanning and shipped 49 releases in 90 days.
- Traced and fixed production issues: FTPS/VPN timeouts on AKS, 502s caused by NGINX rate limiting and ACR image import conflicts; added a WAF with Application Gateway v2 and AGIC.
- Reviewed developer pull requests, wrote runbooks and docs, and shipped Python application code against Jira tickets.

DevOps Engineer (Contract)

eigenKOR

Apr 2025 - Apr 2026

Houston, USA (Remote)

Fintech startup. AWS platform for 15+ microservices across two trading products.

- Built the AWS infrastructure from scratch in Terraform as the sole DevOps engineer, covering both products end to end.
- Went back through the same setup for cost optimisation; right-sizing cut the monthly AWS bill by about 40%.
- Cut order-execution latency by 73% by adding Redis caching and message queues.

PROJECTS

Smriti | Build and release engineering for a desktop app

smriti.jadonharsh.in

macOS and Windows. Tauri, embedded CPython, FastAPI, uv, GitHub Actions. github.com/jadonharsh109/smriti-releases

- Built the release pipeline in GitHub Actions: one version tag builds the macOS (Apple Silicon) and Windows installers, a Homebrew build and a Python wheel, and publishes them with SHA256 checksums.
- Set up signed auto-updates: each release ships a signed update bundle and a latest.json manifest, and the app installs only updates that verify against its built-in public key.
- Made builds reproducible by pinning every third-party build input by SHA256 and mirroring ffmpeg into a dedicated build-inputs release.
- Packaged the FastAPI backend with an embedded Python runtime inside a Tauri shell, plus a headless server mode (start, status, logs, stop) from the same wheel.

CERTIFICATIONS

HashiCorp Certified: Terraform Associate (004)

credly.com/badges/50dc6ea3-ddf0-42c3-a6f4-15439d8ebaa5

Microsoft Certified: Azure Fundamentals (AZ-900)

credly.com/badges/143af26f-3aae-42ec-af4d-84de9c0e47aa

Microsoft SC-900: Security, Compliance & Identity Fundamentals

credly.com/badges/da852b70-0180-4ee3-b5c2-8ffcd74c79b3

AWS Certified Cloud Practitioner

credly.com/badges/c8deb563-b06b-4e37-b450-9c3f53c07ca3

Certified Kubernetes Administrator (CKA) | in preparation

AWARDS

Performance of the Month, HCLTech (Apr 2023) | Upwork Top Rated, 100% Job Success, 5.0 rating

EDUCATION

Master of Computer Applications (MCA), AI & Machine Learning

2026 - 2028

Amity University Online | Pursuing

Bachelor of Computer Applications (BCA), Cloud Computing

2023 - 2026

Amity University Online | CGPA 6.96/10

Class XII (PCM)

2021

Ramakrishna Vidya Mandir (RKVM), Gwalior | 87%

Class X

2019

The Woodstock School, Gwalior | 80%
